San Francisco, California 94103

**Phase I Environmental Site Assessment - ASTM 05 & 13  
490 South Van Ness Avenue, San Francisco, California**

Dear Mr. Flannery:

This report presents the findings of a Phase I Environmental Site Assessment (ESA) completed by Rincon Consultants, Inc. for the project located at 490 South Van Ness Avenue, San Francisco, California. The Phase I ESA was performed in accordance with our proposal dated June 15, 2015 and our current contract for environmental consulting services dated July 30, 2010.

The accompanying report presents our findings and provides an opinion regarding the presence of recognized environmental conditions. Our work program for this project is intended to meet the guidelines outlined in the American Society for Testing and Materials (ASTM), Standard Practice for Environmental Site Assessments: *Phase I Environmental Site Assessment Process* (ASTM Standard E-1527-13). Our scope of services, pursuant to ASTM practice, did not include any inquiries with respect to asbestos containing building materials, biological agents, cultural and historic resources, ecological resources, endangered species, health and safety, indoor air quality unrelated to a release of hazardous substances or petroleum products into the environment, industrial hygiene, lead-based paint, lead in drinking water, mold, radon, regulatory compliance, wetlands, or high voltage power lines.

Thank you for selecting Rincon for this project. If you have any questions, or if we can be of any future assistance, please contact us.

Sincerely,  
**RINCON CONSULTANTS, INC.**

  
Julie Welch Marshall  
Senior Project Manager

  
Ed Morelan, PG, CEG  
Senior Engineering Geologist

## EXECUTIVE SUMMARY

This report presents the findings of a Phase I Environmental Site Assessment (ESA) for the property located at 490 South Van Ness Avenue, San Francisco, California (Figure 1, Vicinity Map). The subject property is currently developed with the remnants of a gas station and an auto repair shop. The subject property is developed with a single-story structure located on the northwestern portion of the property and two canopies.

Rincon Consultants performed a reconnaissance of the subject property on June 23, 2015. The purpose of the reconnaissance was to observe existing subject property conditions and to obtain information indicating the presence of recognized environmental conditions in connection with the subject property. The interior of the onsite building was not observed. One empty waste oil aboveground storage tank was observed near the northwest corner of the onsite building and multiple paint cans were observed on the subject property. No evidence of releases from the storage tank or paint containers was noted.

The subject property is located in an area that is primarily comprised of residential and commercial land uses. Properties in the vicinity of the subject property include multi-family residences, single-family residences, a gasoline and service station, and miscellaneous commercial buildings.

Environmental Data Resources, Inc. (EDR) was contracted to provide a database search of public lists of sites that generate, store, treat or dispose of hazardous materials or sites for which a release or incident has occurred. The EDR search was conducted for the subject property and included data from surrounding sites within a specified radius of the property. The subject property was listed on a release database. According to the EDR report and GeoTracker database, a release of gasoline impacted soil and groundwater occurred at the subject property. The release case was opened in September 1998. Excavation activities occurred on the subject property in 2012, after removal of the underground storage tanks (USTs). The residual concentrations of contaminants were reported by the San Francisco Department of Public Health (SFDPH) to not require further remediation and the case was closed in March 2013.

Eight adjacent properties were listed in databases searched by EDR. Two of the eight properties, 501-505 South Van Ness Avenue and 460 South Van Ness Avenue, were listed as release sites. The southeastern adjacent property, 501-505 South Van Ness Avenue, experienced a release of gasoline that impacted soil and groundwater at the property. However, based on the groundwater flow direction away from the subject property, the release at this property was not expected to impact the subject property. The northern adjacent property, 460 South Van Ness Avenue, experienced a release of heating/fuel oil that impacted soil only. Therefore, based on the soil only nature of the release, the release at this property was not expected to impact the subject property. In addition, multiple adjacent properties were listed as EDR Historical Dry Cleaners. Although none of these properties were listed as release sites, based on the nature of dry cleaning operations, there is a potential for an undetected release to have occurred.

Two upgradient release sites were listed on databases searched by EDR. The release of gasoline at 400 South Van Ness Avenue impacted soil and groundwater at the property. However, based on the most recent groundwater monitoring report, constituents were not detected in groundwater in

the closest upgradient well to the subject property. Therefore, the release from this property is not expected to impact the subject property. The release of gasoline at 1581 15th Street impacted soil only. Therefore, based on the soil only nature of the release and the distance from the subject property, the release at this property is not expected to impact the subject property.

Historical sources reviewed as part of the Phase I ESA include aerial photographs, topographic maps, city directories and building permits. The photos and maps reviewed indicate that the subject property was occupied by a carpenter shop, paint shop, wagon shed and various other commercial and residential properties from 1889 to 1899, developed for residential purposes in 1913, vacant land in 1931, developed with multiple structures in 1938, occupied by a gas station from 1944 to 1949, an auto wash in 1949, occupied by a gas station and restaurant from 1953 to 1966, occupied by an auto service shop and restaurant in 1970, unoccupied in 1971, occupied by a filling station in 1974 (developed in its current configuration), occupied by Mission Arco Service Station in 1977, used for retail sales in 1984, and was occupied by Quality Tune-Up/Auto Shop from 1985 to 2013. Additional information on the subject property indicates that it was first in use as a gas station in 1936 and was converted to an auto tune-up shop in 1983, which remained in place until 2009.

Based on the findings of this Phase I ESA, it is our opinion that there are 2 Recognized Environmental Conditions (RECs), 1 Potential REC, and 1 unknown environmental condition in connection with the property as follows:

***Recognized Environmental Conditions***

- Former use of the subject property as a gasoline station/auto repair shop and former release of gasoline on the subject property (former onsite industrial uses)
- Location of the subject property within a Maher Ordinance Area and potential presence of fill onsite

***Potential Recognized Environmental Condition***

- Hydraulic lifts on the subject property

***Unknown Environmental Condition***

- Adjacent historical dry cleaners (former adjacent industrial uses)

Based on the known residual contamination on the subject property associated with the former use of the subject property as a gasoline station/auto repair shop and former release of gasoline on the subject property, Rincon recommends oversight by SFDPH and preparation of a Soil Management Plan/Remedial Action Plan prior to any redevelopment activities on the subject property. The Remedial Action Plan should describe the procedure to handle the known impacted soil on the subject property, and the Soil Management Plan should describe the procedure to handle unexpected issues such as underground features, wells, etc. In addition, based on the location of the subject property within a Maher Ordinance Area and potential presence of fill onsite, direct communication with the SFDPH would be required.

To evaluate the potential subject property impact associated with the hydraulic lifts on the subject property, Rincon recommends proper removal of the in-ground features of the lifts

(pistons and reservoir) following demolition of the onsite building, and sampling to determine if any releases have occurred.

To evaluate the potential subject property impact associated with the adjacent historical dry cleaners, Rincon recommends soil vapor sampling along the eastern, southern and southwestern perimeters of the subject property. In addition, if groundwater is encountered during redevelopment of the subject property, groundwater samples should be collected and analyzed for volatile organic compounds (VOCs) by EPA Method 8260B.

Based on the construction of the onsite structures in approximately 1974, asbestos and lead-based paint materials may be present onsite. Although not considered a REC, renovation or demolition of the onsite structures would require an asbestos and LBP survey and possibly abatement.

## INTRODUCTION

This report presents the findings of a Phase I ESA conducted for the property located at 490 South Van Ness Avenue, San Francisco, California (Figure 1, Vicinity Map). The Phase I ESA was performed by Rincon Consultants, Inc. for the San Francisco Mayor's Office of Housing and Community Development (SFMOH) in general conformance with ASTM E 1527-13 and our proposal and contract dated June 15, 2015. The following sections present our findings and provide our opinion as to the presence of recognized environmental conditions.

## PURPOSE

The purpose of this Phase I ESA was to assess the environmental conditions of a property, taking into account commonly and reasonably ascertainable information and to qualify for Landowner Liability Protections under the Brownfields Amendments to the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA).

A recognized environmental condition (REC) is defined pursuant to ASTM E 1527-13 as, *"the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to any release to the environment; 2) under conditions indicative of a release to the environment; 3) under conditions that pose a material threat of a future release to the environment"*.

A Controlled REC is defined pursuant to ASTM E 1527-13 as, *"a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). A condition considered by the environmental professional to be a controlled recognized environmental condition shall be listed in the findings section of the Phase I Environmental Site Assessment report, and as a recognized environmental condition in the conclusions section of the Phase I Environmental Site Assessment report"*.

A Historical REC is defined pursuant to ASTM E 1527-13 as,

*“a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by regulatory authority, without subjecting the property to any required controls (for example, use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release a historical recognized environmental condition, the environmental professional must determine whether the past release is a recognized environmental condition at the time the Phase I Environmental Site Assessment is conducted (for example, if there has been a change in the regulatory criteria). If the EP [Environmental Professional] considers the past release to be a recognized environmental condition at the time the Phase I ESA is conducted, the condition shall be included in the conclusions section of the report as a recognized environmental condition”.*

A de minimis condition is defined pursuant to ASTM E 1527-13 as,

*“a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis conditions are not recognized environmental conditions nor controlled recognized environmental conditions”.*

## **SCOPE OF SERVICES**

The scope of services conducted for this study is outlined below:

- Perform a reconnaissance of the site to identify obvious indicators of the existence of hazardous materials.
- Observe adjacent or nearby properties from public thoroughfares in an attempt to see if such properties are likely to use, store, generate, or dispose of hazardous materials.
- Obtain and review an environmental records database search from Environmental Data Resources, Inc. (EDR) to obtain information about the potential for hazardous materials to exist at the subject property or at properties located in the vicinity of the subject property.
- Review files for the subject property and immediately adjacent properties as identified in the EDR report, as applicable.
- Review the current U.S. Geological Survey (USGS) topographic map to obtain information about the subject property’s topography and uses of the subject property and properties in the vicinity of the subject property.
- Review additional pertinent record sources (e.g., California Division of Oil and Gas records, online databases of hazardous substance release sites), as necessary, to identify the presence of RECs at the subject property.
- Review reasonably ascertainable historical resources (e.g., aerial photographs, topographic maps, fire insurance maps, city directories) to assess the historical land use of the subject property and adjacent properties.
- Provide a property owner interview questionnaire to the property owner or a designated subject property representative identified to Rincon by the client.
- Provide a user interview questionnaire to a representative of the client, the user of the Phase I ESA.

- Conduct interviews with other property representatives (e.g., key site manager, occupants), as applicable.
- Review Client-provided information (e.g., previous environmental reports, title documentation), as applicable.

## **SIGNIFICANT ASSUMPTIONS, LIMITATIONS, DEVIATIONS, EXCEPTIONS, SPECIAL TERMS, AND CONDITIONS**

This work is intended to adhere to good commercial, customary, and generally accepted environmental investigation practices for similar investigations conducted at this time and in this geographic area. No guarantee or warranties, expressed or implied are provided. The findings and opinions conveyed in this report are based on findings derived from a site reconnaissance, review of an environmental database report, specified regulatory records and historical sources, and comments made by interviewees. This report is not intended as a comprehensive site characterization and should not be construed as such. Standard data sources relied upon during the completion of Phase I ESAs may vary with regard to accuracy and completeness. Although Rincon believes the data sources are reasonably reliable, Rincon cannot and does not guarantee the authenticity or reliability of the data sources it has used. Additionally, pursuant to our contract, the data sources reviewed included only those that are practically reviewable without the need for extraordinary analysis.

*Rincon has identified evidence that suggests that hazardous materials or petroleum products may exist at the site at levels that could require mitigation. Additional research, including surface or subsurface sampling and analysis, can reduce SFMOH's risks, but no techniques commonly employed can eliminate these risks altogether.*

In addition, pursuant to ASTM E 1527-13 practice, our scope of services did not include any inquiries with respect to asbestos containing building materials, biological agents, cultural and historic resources, ecological resources, endangered species, health and safety, indoor air quality unrelated to release of hazardous substances or petroleum products into the environment, industrial hygiene, lead-based paint, lead in drinking water, mold, radon, regulatory compliance, wetlands, or high voltage power lines.

## **USER RELIANCE**

SFMOH has requested this assessment and will use the assessment to provide information for the purposes of purchasing or acquiring said property. This Phase I ESA was prepared for use solely and exclusively by SFMOH. No other use or disclosure is intended or authorized by Rincon. Also, this report is issued with the understanding that it is to be used only in its entirety. It is intended for use only by the client, and no other person or entity may rely upon the report without the express written consent of Rincon.

## **SITE DESCRIPTION**

### **Location**

The subject property is a 0.327 acre property located on the northwest corner of 16<sup>th</sup> Street and South Van Ness Avenue (Block 2552, Lot 008) and south of Adair Street in San Francisco, California (Figure 2, Site Map). The property is identified as Assessor's Parcel Number (APN) 3553008.

### **Subject Property and Vicinity General Characteristics**

The subject property is currently developed with the remnants of a gas and service station and auto repair shop. It is developed with a vacant, single-story structure and two canopies.

The subject property is located in an area that is primarily comprised of residential and commercial land uses. Properties in the vicinity of the subject property include multi-family residences, single-family residences, a gasoline and service station, and miscellaneous commercial buildings. The current adjacent land uses are described in Table 1 and depicted on Figure 3, Adjacent Land Use Map.

**Table 1 - Current Uses of Adjacent Properties**

<b>Area</b>	<b>Use</b>
Northern Properties	Adair Street, then residential
Eastern Properties	South Van Ness Avenue, then commercial and residential
Southern Properties	16th Street, then gasoline and service station, residential and commercial
Western Properties	Residential

### **Descriptions of Structures, Roads, Other Improvements on the Site**

A chain-link fence was noted around the perimeter of the subject property. There are two canopies on the property. The larger canopy connects with the service station building on the northwestern portion of the subject property. The ground is being overtaken by grass and weeds and scattered municipal solid waste is located throughout the property.

Access to the subject property is available from a driveway on 16th Street.

Although the sewer is reported to be disconnected, water and sewer service is provided by the San Francisco Public Utilities Commission. Pacific Gas & Electric provides electrical and natural gas service. Solid waste collection and disposal services are provided by Recology.

## **USER PROVIDED INFORMATION**

As described in ASTM E 1527-13 Section 6, SFMOH was interviewed for actual knowledge pertaining to the subject property to help identify recognized environmental conditions in connection with the property. Kevin Kitchingham, Project Manager for SFMOH, completed the

User Questionnaire as provided by ASTM Appendix X3. A copy of the completed questionnaire is included as Appendix 1.

Based on our review of the completed questionnaire, the user did not review the following sources of information and/or is unaware of information regarding the following:

- recorded land title records (or judicial records, where appropriate) that identify any environmental liens filed or recorded against the property
- recorded land title records (or judicial records, where appropriate) that identify any activity and land use limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law
- specialized knowledge or experience related to the property or nearby properties
- obvious indicators that point to the presence or likely presence of releases at the property
- pending, threatened, or past litigation relevant to hazardous substances or petroleum products, in, on, or from the site
- pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the site
- notice from any government entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products

Based on our review of the completed questionnaire, the user did review the following the following sources and is unaware of information regarding the following:

- Title Report that identifies information pertaining to environmental cleanup liens or AULs for the subject property
- commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases

Additionally, the user indicated that the purchase price being paid for the subject property reasonably reflects the fair market value of the property, and he is not aware of a reduction in value for the subject property relative to any known environmental issues.

The following documents regarding the subject property were provided for Rincon's review:

- *Environmental Site Assessment, 490 S Van Ness Avenue, San Francisco, CA* prepared by AllWest Environmental, Inc. and dated January 16, 2010 – A review of this report indicated that ten USTs were installed on the subject property in 1936. It was reported that nine of the USTs stored gasoline and 1 UST stored waste oil. In addition, the properties in the vicinity of the subject property were reported to have a low probability of impacting soil and groundwater at the subject property. In addition, although residual TPH and petroleum solvent contamination in soil at the subject property as the result of a release from the gasoline USTs, the soil does not classify as hazardous waste. However, if future redevelopment of the subject property is planned and groundwater is encountered, the groundwater should be reevaluated for TPH prior to discharge to the sewer system.

- *Report of Environmental Corrective Action, Quality Tune-Up, 490 South Van Ness Avenue, San Francisco, CA* prepared by Hydro Analysis, Inc. and dated June 14, 2012 - A review of this document indicated that although small amounts of residual TPH contamination remains onsite at locations where soil over-excavation was deemed impractical due to the location of the sidewalks and streets, the concentrations of residual TPH are expected to decrease over time due to natural attenuation.
- *Remedial Action Completion Certification, Underground Storage Tank (UST) Case, Commercial Property, 490 South Van Ness Avenue* prepared by San Francisco Department of Public Health (SFDPH) and dated March 21, 2013 - A review of this document indicated that a release of gasoline occurred on the subject property associated with the 8 USTs located onsite. Four of the USTs were removed in 1998 and the remaining four USTs were removed in 2012. From January to March 2012, Approximately 4,500 cubic yards of impacted soil were removed to depths of between 8 and 14 feet on the subject property and disposed offsite. Monitoring wells were installed, and then removed following closure of the site. The release case was closed under the Low Threat Closure Policy and the residual concentration following remediation was reported to not trigger further remedial action. However, it is stated that mitigation measures may be enacted as part of the planned construction project, including "passive or active ventilation in and below a proposed below grade garage and/or passive venting along the structure in areas of peripheral residual contamination." The residual concentration of constituents in soil are reported as follows:
  - 1400 milligrams per kilogram (mg/kg) of total petroleum hydrocarbons as gasoline (TPH-g)
  - 2.6 mg/kg of benzene
  - 1.0 mg/kg of toluene
  - 8.4 mg/kg of ethyl benzene
  - 21 mg/kg of xylenes
  - 2.9 mg/kg of lead

Residual concentrations of Methyl tert-butyl ether (MTBE) were not detected in soil. The residual concentrations of contaminants in groundwater are reported as follows:

- 1700 micrograms per liter ( $\mu\text{g/L}$ ) of TPH-g
- 210  $\mu\text{g/L}$  of benzene and toluene
- 42  $\mu\text{g/L}$  of ethyl benzene
- 460  $\mu\text{g/L}$  of xylenes

Residual concentrations of MTBE and lead were not detected in groundwater.

- *Site Mitigation Plan, 490 South Van Ness Avenue, San Francisco, California* prepared by Hydro Analysis, Inc. and dated May 9, 2013 - A review of this document indicated that the proposed land development of the subject property involved the complete excavation of the property down to a depth of 15 feet below grade. Profiling of the areas with residual contamination (street sidewalks, pump islands, building subsurface, previous tank pits and native soil) is planned.

## **RECORDS REVIEW**

### **PHYSICAL SETTING SOURCES**

#### **Topography**

The current USGS topographic map (San Francisco North Quadrangle, 1999) indicates that the subject property is situated at an elevation of about 25 feet above mean sea level with topography sloping down to the east northeast.

#### **Geology and Hydrogeology**

##### **Regional Geology**

The subject property is located in the Coast Ranges Geomorphic Province. The province is characterized by northwest-southeast trending mountains and faults sub-parallel to the San Andreas Fault Zone. The province is comprised of marine and terrestrial sedimentary deposits underlain by Salinian Block granitic rocks west of the San Andreas Fault Zone and the Franciscan Assemblage east of the San Andreas Fault Zone.

##### **Site Geology**

According to the US Geologic Map (San Francisco North Quadrangle, 1958), the subject property is underlain by alluvium which is described as predominantly clayey silty sand and clayey silt from the Holocene. The maximum thickness is reported to be approximately 25 feet.

##### **Regional Groundwater Occurrence and Quality**

The site is located within the Downtown San Francisco groundwater basin (2-40). According to the Regional Water Quality Control Board (RWQCB) Basin Plan for the San Francisco Bay Region, this basin has been assigned existing beneficial uses for municipal and agricultural supply, and potential beneficial uses for industrial process and service supply.

To determine groundwater depth and flow direction at the subject property, the State of California State Water Quality Control Board's (SWQCB's) online GeoTracker database was reviewed. According to *Case Closure Form Leaking Underground Fuel Storage Tank Program, 490 South Van Ness Avenue, San Francisco, CA* prepared by the San Francisco Department of Public Health and dated January 10, 2013, groundwater is reported to be encountered between 3 and 12 feet below grade and flow to the south-southeast at the subject property.

### **STANDARD ENVIRONMENTAL RECORD SOURCES**

Environmental Data Resources, Inc. (EDR) was contracted to provide a database search of public lists of sites that generate, store, treat or dispose of hazardous materials or sites for which a release or incident has occurred. The EDR search was conducted for the subject property and included data from surrounding sites within specified radii of the property. A copy of the EDR report, which specifies the ASTM search distance for each public list, is included as Appendix 2.

As shown on the attached EDR report, federal, state and county lists were reviewed as part of the research effort. Please refer to Appendix 2 for a complete listing of sites reported by EDR and a description of the databases reviewed.

The Map Findings Summary, included in the EDR report, provides a summary of the databases searched, the number of reported facilities within the search radii, and whether the facility is located onsite or adjacent to the subject property. The following information is based on our review of the Map Findings Summary and the information contained in the EDR report.

### Subject Property

The subject property at 490 South Van Ness Avenue is listed in the following databases by EDR: HIST UST, UST, LUST, HAZNET, EDR Historical Auto Station, FINDS, FID, RGA LUST and SWEEPS UST databases.

### Offsite Properties

Offsite properties listed by EDR fall under two general categories of databases: those reporting unauthorized releases of hazardous substances (e.g., LUST, National Priority List [a.k.a. Superfund sites], and corrective action facilities), and databases of businesses permitted to use hazardous materials or generate hazardous wastes, for which an unauthorized release has not been reported to a regulatory agency.

Rincon reviewed the EDR Radius Map and select detailed listings to evaluate their potential to impact the subject property, based on the following factors:

- Reported distance of the facility from the subject property
- The nature of the database on which the facility is listed, and/or whether the facility was listed on a database reporting unauthorized releases of hazardous materials, petroleum products, or hazardous wastes
- Reported case type (e.g., soil only, failed UST test only)
- Reported substance released (e.g., chlorinated solvents, gasoline, metals)
- Reported regulatory agency status (e.g., case closed, “no further action”)
- Location of the facility with respect to the reported groundwater flow direction (discussed in the Geology and Hydrogeology section of this report)

Facilities/properties that were interpreted by Rincon to be of potential environmental concern to the subject property, based on one or more of the factors listed above, are summarized in Table 2. In accordance with ASTM, contamination migration pathways in soil, groundwater, and soil vapor were considered in our analysis of offsite properties of potential environmental concern.

**Table 2 - EDR Listing Summary of Select Sites within One-Eighth Mile of the Subject Site**

Regulatory agency information reviewed for the listings in the table above are summarized in the Additional Environmental Record Sources section of this report.

### Orphan Listings

EDR reported 176 orphan or unmapped site listings, which EDR is unable to plot due to insufficient address information. Based on Rincon's review of the limited address information or site descriptions for the orphan listings, none of the listings are expected to impact the subject property.

## ADDITIONAL ENVIRONMENTAL RECORD SOURCES

### Review of Agency Files

As a follow-up to the database search, Rincon reviewed regulatory information for facilities within the specified search radii that were interpreted to have the potential to impact the subject

property, based on one or more factors previously discussed (e.g., distance, open case status, up-gradient location, soil vapor migration).

The following is a summary of our review of regulatory information obtained from review of online sources (e.g., SWRCB GeoTracker database, DTSC Envirostor database) and/or files requested from the applicable regulatory agency, as described below.

### **Subject Property**

The subject property was listed in 9 databases searched by EDR: HIST UST, UST, LUST, HAZNET, EDR Historical Auto Station, FINDS, FID, RGA LUST and SWEEPS UST databases. According to the EDR report and GeoTracker database, a release of gasoline occurred that impacted soil and groundwater at the subject property. The release case was opened in September 1998 and closed in March 2013. A summary of the case closure report and excavation activities is provided in the User-Provided Information section above.

### **Adjacent Properties**

Eight adjacent properties were listed in databases searched by EDR:

- *A C Cleaners/Automotive City, Inc./Automotive City Service Station/Doc's AC Service Station at 501 South Van Ness Avenue:* This property is located adjacent to the southeast of the subject property and is listed on the EDR Historical Auto Station, EDR Dry Cleaners, HIST UST, UST, FID, SWEEPS UST, LUST and HIST UST databases. According to the EDR report, Doc's A C Service Station occupied the property in 1953, A C Cleaners occupied the property from 1953 to 1958, Automotive City occupied the property from 1953 to 1999, Chevron occupied the property in 2000, H&S Petroleum, Inc. occupied the property in 2002, Auto City Car Wash occupied the property in 2005 and 2006, Rat Petroleum occupied the property from 2005 to 2008 and Auto City occupied the property in 2007. In addition, 5 gasoline USTs were reported to be located on the property. According to the EDR report and the GeoTracker database, a release of gasoline occurred at this property in January 2004. As of June 2012, the release case is open for assessment and remedial action. In September 2014, 6 soil borings (B-1 through B-6) were advanced for additional plume characterization. The soil samples and groundwater samples collected were analyzed for total petroleum hydrocarbons as gasoline (TPHg); benzene, toluene, ethylbenzene, xylenes (BTEX), methyl tertiary butyl ether (MTBE), tert-amyl methyl ether (TAME), tert-butyl alcohol (TBA), diisopropyl ether (DIPE), and ethyl tert-butyl ether (ETBE) by EPA Method 8260B; naphthalene by EPA Method 8260; and LUFT 5 Metals by EPA Method E200.8. Grab groundwater samples were also analyzed for total petroleum hydrocarbons as diesel (TPHd) and TPH as motor oil (TPHmo) with silica gel cleanup. The soil analytical results indicated that no hydrocarbons, fuel oxygenates or naphthalene were detected. In addition, all LUFT metal concentrations detected were below the San Francisco Environmental Screening Levels (ESLs) established by the San Francisco Regional Water Quality Control Board (RWQCB). The groundwater analytical results indicated that boring B-6 had a MTBE concentration of 2,000 micrograms per liter ( $\mu\text{g/L}$ ), which was reported to be above commercial and residential ESLs. In addition, nickel was detected in the groundwater sample collected from each boring location (B-1 through B-6) at levels above the commercial and residential ESL of  $8.2 \mu\text{g/L}$ . However, it was also noted that the nickel concentrations may be representative of background conditions. According to the maps provided, the extent of contamination does not appear to impact the subject property. Therefore, the release at this property is not expected to impact the subject property.

- **SH Frantz at 2909 16th Street:** This property is located adjacent to the south of the subject property and is listed on the EDR Historical Dry Cleaners database. According to the EDR report, SH Frantz occupied the property from 1925 to 1944, Hong Luke Tom occupied the property in 1949 and Sunrise Laundry occupied the property in 1953. Although no releases were reported, based on the chemicals commonly associated with cleaners, the adjacent historical dry cleaner property is considered an unknown environmental condition.
- **Dutch Door Laundromat at 2921 16th Street:** This property is located adjacent to the south of the subject property and is listed on the EDR Historical Dry Cleaners database. According to the EDR report, Dutch Door Laundromat occupied the property in 1966 and Ayuda Scholarship Fund Laundromat occupied the property from 1971 to 1977. Although no releases were reported, based on the chemicals commonly associated with cleaners, the adjacent historical dry cleaner property is considered an unknown environmental condition.
- **Nelly Cleaners/America Cleaners at 2929 16th Street:** This property is located adjacent to the southwest of the subject property and is listed on the EDR Historical Dry Cleaners database. According to the EDR report, Sunrise Laundry & Cleaners occupied the property in 1957, America Cleaners occupied the property in 1962, San Martin Cleaners occupied the property in 1971, Nelly Cleaners occupied the property in 1977 and ORD Dry Cleaning occupied the property in 1982. Although no releases were reported, based on the chemicals commonly associated with cleaners, the adjacent historical dry cleaner property is considered an unknown environmental condition.
- **Vincent S Cleaners/Sunset Deluxe Cleaners at 2892 16th Street:** This property is located adjacent to the east of the subject property and is listed on the EDR Historical Dry Cleaners databases. According to the EDR report, Vincent S Cleaners occupied the property in 1953, Garden City Cleaners & Laundry occupied the property in 1958 and Sunset Deluxe Cleaners occupied the property in 1962. Although no releases were reported, based on the chemicals commonly associated with cleaners, the adjacent historical dry cleaner property is considered an unknown environmental condition.
- **Apartment Building at 460 South Van Ness Avenue:** This property is located adjacent to the north of the subject property and is listed on the LUST and UST databases. According to the EDR report, a release of heating/fuel oil impacted soil at this property in October 1997. The case was closed in November 1997. Although the extent of contamination is unknown, based on the soil only nature of the release and the location of the property across Adair Street (approximately 40 feet), the release from this property is not expected to impact the subject property.

### Up-gradient Release Sites

Two nearby properties were listed in release databases searched by EDR:

- **Andy's Shell/Shell Service Station at 400 South Van Ness Avenue:** This property is located within 1/8 mile to the north of the subject property and is listed on a release database. According to the EDR report and GeoTracker database, a release of gasoline impacted groundwater at this property in March 2004. The case was closed in December 2007. According to the case closure summary, dated October 2007, groundwater flow direction is reported to be to the northeast. It was reported that in addition to dual-phase extraction and air sparging remediation events at this property, 125 tons of impacted material was excavated and disposed offsite during the removal of the USTs in October 2006. According to the most recent groundwater monitoring report, dated October 2007, no constituents were detected in the monitoring well closest to the subject property. Therefore, based on

the direction of groundwater flow to the northeast and the fact that no constituents were detected in the monitoring well closest to the subject property (approximately 265 feet north northeast of the subject property, the release from this property is not expected to impact the subject property.

- **Commercial Property/M&M Auto Repair at 1581 15th Street:** This property is located within 1/8 mile to the northwest of the subject property and is listed on a release database. According to the EDR report and GeoTracker database, a release of gasoline impacted soil at this property. This release case was closed in July 2003. According to the case closure summary, it was reported that although holes were discovered in the USTs, soil samples indicated that petroleum hydrocarbons had not impacted surrounding soils. Therefore, based on the results of the soil sample analysis (non-detect) and the soil only nature of the release, the release from this property is not expected to impact the subject property.

In addition, although not listed as release sites, several properties were listed on the historical auto stations or historical dry cleaners databases. Please note that the auto stations database listings may include parking garages, occupations of residents, auto stations, gas stations, repair stations, etc. and the drycleaners database listings may include dry cleaning facilities, occupations, coin operated laundromats, home businesses, etc. A list of the historical auto stations and historical dry cleaners in the vicinity of the subject property is included on executive summary pages 58 through 64 of the EDR report (Appendix 3).

## **KNOWN OR SUSPECT CONTAMINATED RELEASE SITES WITH POTENTIAL VAPOR MIGRATION**

The EDR report was reviewed to identify nearby known or suspect contaminated sites that have the potential for contaminated vapor originating from the nearby site to be migrating beneath the subject property. Based on the ASTM E 2600-10, *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions*, the following minimum search distances were initially used to determine if contaminated soil vapors from a nearby known or suspect contaminated site have the potential to be migrating beneath the subject property:

- 1/10 mile (528 feet) for petroleum hydrocarbons
- 1/3 mile (1,760 feet) for other contaminants of concern (COCs)

If up-gradient known or suspect contaminated sites are located within the above referenced distances from the subject property, online resources are reviewed to determine the extent of the contaminated plume at those sites. The following describes search distances for contaminated plumes of petroleum hydrocarbons and other COCs.

### ***Petroleum Hydrocarbons***

Although a release of gasoline was reported at the property adjacent to the southeast of the subject property, based on our review of the EDR report information as indicated above, there are no adjacent or up-gradient known or suspect petroleum hydrocarbon impacted soil or groundwater plumes located within 30 feet of the subject property.

### *Other COCs*

Based on our review of the EDR report, 3 former dry cleaners are located adjacent to the subject property and may have (or have the potential to have) contaminated soil or groundwater plumes located within 100 feet of the subject property. Based on the proximity of these known or suspect contaminated soil and/or groundwater plumes to the subject property, there is a potential for impacted soil vapor to be migrating beneath the subject property.

### **Review of State of California Division of Oil and Gas Records**

A review of the Department of Conservation, Division of Oil, Gas & Geothermal Resources Online Mapping System indicates that no oil wells are located within 1 mile of the subject property.

## **HISTORICAL USE INFORMATION ON THE PROPERTY AND THE ADJOINING PROPERTIES**

The historic records review completed for this Phase I ESA includes aerial photographs, topographic maps, fire insurance maps, city directories and building permits as detailed in the following sections. Copies of the historical resources reviewed are included in Appendix 3. Table 3 provides a summary of the historical use information available for the subject property.

### **Review of Historic Aerial Photographs**

Aerial photographs from EDR's aerial photograph collection were obtained and reviewed.

### **Review of City Directory Listings**

EDR was contracted to provide copies of city directory listings for the subject property.

### **Review of Fire Insurance Maps**

EDR was contracted to provide copies of fire insurance maps for the subject property.

### **Review of Historic Topographic Maps**

Historic topographic maps from EDR's map collection were reviewed.

### **Review of City of San Francisco Building Permit Records**

Building permit records for the subject property were reviewed on the City of San Francisco Planning Department's Property Information Map website<sup>1</sup>. The permits are incorporated into Table 3.

---

## Summary of Historic Uses

### Subject Property

Based on our review of the documents listed above and summarized in Table 3 below, it appears that the subject property was occupied by a carpenter shop, paint shop, wagon shed and various other commercial and residential properties from 1889 to 1899, developed for residential purposes in 1913, vacant land in 1931, developed with multiple structures in 1938, occupied by a gas station from 1944 to 1949, an auto wash in 1949, occupied by a gas station and restaurant from 1953 to 1966, occupied by an auto service shop and restaurant in 1970, unoccupied in 1971, occupied by a filling station in 1974 (developed in its current configuration), occupied by Mission Arco Service Station in 1977, used for retail sales in 1984, and was occupied by Quality Tune-Up/ Auto Shop from 1985 to 2013. Additional information on the subject property indicates that it was first in use as a gas station in 1936 and was converted to an auto tune-up shop in 1983, which remained in place until 2009.

**Northern Adjacent Property – 460 S Van Ness**

Based on our review of the documents listed above, it appears that the northern adjacent properties were in use as a wood, coal, and hay storage building and residential buildings in 1899, developed with residential buildings in 1913, and developed to additional residential buildings and apartments, its current configuration, in 1949. City directories indicate that the northern adjacent property has been used for residential purposes since at least 1935, used for commercial businesses from 1935 to 1949 and used as a gas station in 1944.

**Eastern Adjacent Property – 483-487 S Van Ness**

Based on our review of the documents listed above, it appears that the eastern adjacent properties were in use as a pork packing house, a wood and coal yard, and a wine house in 1889, developed with residential buildings in 1899, developed with residential buildings and an upholstering shop in 1913, developed with a printing shop, metal products manufacturing, a machine shop, and residential buildings in 1949, developed with a small machine shop and residential buildings in 1970, developed with a used car shop, a small machine shop, a furniture shop, and a residential area in 1974, and developed with a small machine shop, a used car shop, and residential buildings, its current configuration, in 1984. City directories indicate that the eastern adjacent property was used for residential purposes in 1940 and used for commercial purposes from 1944 to 1971.

**Southern Adjacent Property – 2901 16th Street**

Based on our review of the documents listed above, it appears that the southern adjacent properties were in use as residential flats in 1899, developed with residential buildings and gas

and oil and auto service complex to the southeast in 1950, developed with residential buildings, a drug store, and gas and oil and auto service complex to the southeast, in 1975, developed with residential buildings and a filling station and auto service complex to the southeast, its current configuration, in 1987. City directories indicate that the southern adjacent property was used for commercial purposes from 1920 to 1990.

#### **Western Adjacent Property - 2940-2944 16th Street**

Based on our review of the documents listed above, it appears that the western adjacent properties were in use as paint shops, a hay, grain, wood, and coal supply shop, developed with residential buildings in 1899 and 1913, developed with the San Francisco Labor Temple, a steel factory, and residential buildings in 1949, developed with the San Francisco Labor Temple and residential buildings, its current configuration, in 1988. City directories indicate that the western adjacent property was used for commercial/industrial purposes from 1920 to 1990.

#### **Gaps in Historical Sources**

Several gaps of greater than 5 years were identified in the historical records reviewed, from 1889 to 1895, from 1899 to 1913, from 1915 to 1931, from 1931 to 1938 and from 1938 to 1944. These gaps are considered insignificant because the subject property use appears to be similar prior to and following the gaps.

## **INTERVIEWS**

Rincon Consultants performed interviews regarding the subject property and surrounding areas. The purpose of the interview was to discuss current and historical subject property conditions and to obtain information indicating the presence of recognized environmental conditions in connection with the property.

### **INTERVIEW WITH OWNER/SITE MANAGER**

An interview questionnaire was provided to the property owner and site manager, Maurice Casey, prior to the site reconnaissance. A copy of the completed questionnaire is included in Appendix 1. The following information is based on information obtained during our review of the completed questionnaire.

The property owner indicated the following:

- The subject property was formerly used as a gasoline station and motor vehicle repair facility
- The subject property is currently idle.
- The northern adjacent property was formerly and is currently developed with a public roadway.
- The eastern adjacent property was formerly and is currently developed with a public roadway.
- The southern adjacent property was formerly and is currently developed with a public roadway.

- The western adjacent property comprises various uses such as residential apartments, offices, music studios and a café.
- The subject property was acquired in July 2009 by JCN Developers, LLC and was transferred to South Van Ness 490, LP/Benecia Lake, LLC/Maurice Casey as Tenants in Common in December 2014.
- The previous owner of the subject property is the Betty Ann Kniesche Trust and the Janice Mayfield Trust.
- During the tenancy of the mechanic shop, discarded auto batteries were located onsite. However, they were removed at the end of the mechanic shop tenancy and prior to the soil cleanup.
- Oils, solvents and motor vehicle fuel were likely onsite due to the past use of the property as a gasoline station and mechanic shop.
- No hazardous waste is currently generated onsite.

Mr. Casey indicated that there were previously USTs (with associated piping) on the subject property and that there is currently an empty aboveground waste oil tank onsite. He also indicated that there is stained soil on the subject property from leaking USTs associated with the previous use of the subject property as a gasoline station. However, he indicated that the impacted soil has been removed and cleanup certification has been issued by the San Francisco Department of Public Health.

Mr. Casey indicated that there is surficial staining on the floor of a small structure/shed on that subject property that was formerly used as a mechanic/service shop operation. In addition, two hydraulic lifts were located onsite associated with the mechanic/service shop. The lifts are reported to have been removed, but the underground pistons are reported to still be in place.

Mr. Casey indicated that there is no evidence of fill dirt, pits, ponds or lagoons, records indicating the presence of PCBs, records indicating the presence of pesticides or herbicides.

Mr. Case also indicated that it is unknown if industrial drums, sumps, clarifier or solvent degreasers were located on the subject property.

Mr. Casey indicated that he is not aware of any pending, threatened, or past litigation or administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property.

## **INTERVIEWS WITH OCCUPANTS**

Because the gasoline station/mechanic shop is no longer in business, no occupants were interviewed as part of this research effort.

## **INTERVIEWS WITH LOCAL GOVERNMENT OFFICIALS**

Records were requested from the Hazardous Materials Unified Program Agency (HMUPA) and Local Oversight Program (LOP) for properties of concern in the vicinity of the subject property. The records available from HMUPA and LOP are discussed in the Review of Agency Files section above.

The San Francisco Planning Department, Property Information Map<sup>2</sup> was reviewed to assess whether the subject property is located within the Maher Ordinance area. The Maher Ordinance is Article 22A of the San Francisco Health Code and Article 106A.3.4.2 of the San Francisco Building Code. The Maher Ordinance area applies to areas with:

- current or historical industrial use or zoning,
- areas within 100 feet of current or historical underground tanks (including current and former gas stations or dry cleaners),
- filled former Bay or creek areas, and
- areas within 150 feet of a current or former elevated highway.

According to the Maher Property Information Map, the subject property is located in a Maher Ordinance area. In addition, the subject property has historic onsite industrial uses, and the adjacent property to the southeast has historic industrial uses.

## **INTERVIEWS WITH OTHERS**

Rincon did not attempt to interview neighboring property owners or others as part of this research effort.

## **SITE RECONNAISSANCE**

Rincon Consultants performed a reconnaissance of the subject property on June 23, 2015 accompanied by Maurice Casey. The purpose of the reconnaissance was to observe existing subject property conditions and to obtain information indicating the presence of recognized environmental conditions in connection with the property.

## **METHODOLOGY AND LIMITING CONDITIONS**

The site reconnaissance was conducted by 1) observing the subject property from public thoroughfares, 2) observing the adjacent properties from public thoroughfares, 3) observing the exterior of the structures, and 4) observing the subject property from walking paths.

The interior of the onsite building was not observed during the site reconnaissance.

## **CURRENT USE OF THE PROPERTY AND ADJACENT PROPERTIES**

The subject property is currently abandoned. It is developed with a single structure, formerly used as a mechanic/service shop for the former gasoline station. In addition, two canopies are located on the subject property.

---

<sup>2</sup> <http://ec2-50-17-237-182.compute-1.amazonaws.com/PIM/>

## **PAST USE OF THE PROPERTY AND ADJACENT PROPERTIES**

Based on our site reconnaissance, based on the layout of the subject property, it is apparent that the property was formerly occupied by a gasoline/service station. Past uses of adjacent properties are not readily apparent based on the site reconnaissance.

## **CURRENT OR PAST USES IN THE SURROUNDING AREAS**

The subject property is surrounded by residential and commercial land uses as detailed in the Site Description section of this report. Past uses of the surrounding area are not readily apparent based on the site reconnaissance.

## **GEOLOGIC, HYDROGEOLOGIC, HYDROLOGIC AND TOPOGRAPHIC CONDITIONS**

Geologic, Hydrogeologic, Hydrologic and topographic information are as previously stated in the Physical Settings Section of this report.

## **GENERAL DESCRIPTION OF STRUCTURES**

Onsite structures are as described previously in the Site Description section of this report.

## **INTERIOR AND EXTERIOR OBSERVATIONS**

### **Storage Tanks**

During the site reconnaissance, Rincon observed a small, empty, 6 foot by 4 foot used oil aboveground storage tank near the northwest corner of the onsite building. No other tanks were observed during the site reconnaissance. However, it was reported by the subject property representative that multiple USTs were located on the subject property in connection with the former use of the subject property as a gasoline station/mechanic shop. Although Rincon did not observe indications of releases from the tanks on the subject property, it was apparent that excavations had been conducted.

### **Drums**

During the site reconnaissance, no drums were observed on the subject property.

### **Hazardous Substances and Petroleum Products**

With the exception of the used oil tank and a few paint containers, no hazardous substances or petroleum products were identified at the subject property. No releases from the paint containers or used oil tank were observed.

## **Unidentified Substance Containers**

Unidentified substance containers or unidentified containers that might contain hazardous substances were not observed during the site reconnaissance.

## **Odors**

During the site reconnaissance, Rincon did not identify any strong, pungent, or noxious odors.

## **Pools of Liquid**

During the site reconnaissance, Rincon did not identify any pools of liquid including standing surface water. In addition, sumps containing liquids likely to be hazardous substances or petroleum products were not observed.

## **Indications of Polychlorinated Biphenyls (PCBs)**

During the site reconnaissance, no indications of PCBs were observed. However, according to information provided by Mr. Casey, the underground pistons for the former hydraulic lifts are still in place.

## **Other Conditions of Concern**

During the site reconnaissance Rincon did not note any of the following:

- clarifiers and sumps
- degreasers/parts washers
- pits, ponds, and lagoons
- stressed vegetation
- waste water
- wells
- septic systems/effluent disposal system

**Stains or Corrosion** – Although the interior of the onsite building was not observed, the floor was reported to have surficial stains associated with its former use as a mechanic/service shop.

**Stained Soil** – Although no stained soil was observed on the subject property during the site reconnaissance, it was reported that impacted soil from a release of gasoline was excavated and disposed offsite. The release case received closure from the San Francisco Department of Public Health.

**Solid Waste/Debris** – Scattered municipal solid waste was observed on the subject property during the site reconnaissance.

**Wells** – Although no wells were observed on the subject property, it was reported that monitoring wells were installed in connection with the former release of gasoline on the subject property. The monitoring wells were reported to have been abandoned.

## EVALUATION

### FINDINGS

Known or suspect environmental conditions associated with the property include the following:

- Former use of the subject property as a gasoline station/ auto repair shop and former release of gasoline on the subject property (former industrial use)
- Hydraulic lifts on the subject property
- Adjacent historical dry cleaners (former adjacent industrial uses)
- Adjacent release of gasoline from 501 South Van Ness Avenue
- Location of the subject property within a Maher Ordinance Area

### OPINIONS

- A. *Former use of the subject property as a gasoline station/auto repair shop and former release of gasoline on the subject property (former industrial use)* – According to the records reviewed, the subject property was used as a gasoline station from 1936 to 1983, when it was converted to an auto repair facility. A release of gasoline occurred in September 1998 in connection with holes observed in the USTs on the subject property. Contaminated soil and groundwater were disposed offsite and the case was closed in March 2013. Residual contamination remains on the subject property, but not at levels reported to warrant mitigation. However, if the property is to be redeveloped, the San Francisco Department of Public Health recommends that if groundwater is encountered, that groundwater should be reevaluated for TPH prior to discharge to the sewer system. However, based on the fact that known contamination remains onsite, the former release of gasoline on the subject property is considered a REC.
- B. *Hydraulic lifts on the subject property* – Although the interior of the onsite building was not observed during the site reconnaissance, based on information provided by the property owner, hydraulic lifts were located on the subject property. The lifts were reported to have been removed, but the pistons remain in-ground. Therefore, based on the underground nature of the hydraulic lifts, they are considered a potential REC.
- C. *Adjacent historical dry cleaners (former adjacent industrial uses)* – According to the historical records reviewed, historical dry cleaners were located to the east, south and southwest of the subject property, since as early as 1925. Although no releases were reported, based on the chemicals commonly associated with cleaners, the adjacent historical dry cleaners are considered an unknown environmental condition.
- D. *Adjacent release of gasoline from 501 South Van Ness Avenue* – According to the records reviewed, a release of gasoline impacted both the soil and groundwater at this property, adjacent to the southeast of the subject property, in January 2004. Soil and groundwater samples were collected. Concentrations of MTBE and nickel were detected in groundwater, at levels reported to be above commercial and residential ESLs, although it was also noted that the nickel concentrations may be representative of background conditions. According to the maps provided, the extent of contamination does not appear to impact the subject property. Therefore, based on the location of this property downgradient of the subject property, the release from this property is not expected to impact the subject property and is considered *de minimis*.

- E. *Location of the subject property within a Maher Ordinance Area and potential presence of fill onsite* - Since the subject property is located within a Maher Ordinance area, the potential presence of fill material onsite is considered a REC.

## CONCLUSIONS

Rincon has performed a Phase I ESA in general conformance with the scope and limitations of ASTM E 1527-13 for the property located at 490 South Van Ness Avenue, San Francisco, California. This assessment has revealed evidence of 2 RECs, 1 Potential REC, and 1 unknown environmental condition as follows:

### *Recognized Environmental Conditions*

- Former use of the subject property as a gasoline station/auto repair shop and former release of gasoline on the subject property (former onsite industrial uses)
- Location of the subject property within a Maher Ordinance Area and potential presence of fill onsite

### *Potential Recognized Environmental Condition*

- Hydraulic lifts on the subject property

### *Unknown Environmental Condition*

- Adjacent historical dry cleaners (former adjacent industrial uses)

## RECOMMENDATIONS

Based on the known residual contamination on the subject property associated with the former use of the subject property as a gasoline station/auto repair shop and former release of gasoline on the subject property, Rincon recommends oversight by SFDPH and preparation of a Soil Management Plan/Remedial Action Plan prior to any redevelopment activities on the subject property. The Remedial Action Plan should describe the procedure to handle the known impacted soil on the subject property, and the Soil Management Plan should describe the procedure to handle unexpected issues such as underground features, wells, etc. In addition, based on the location of the subject property within a Maher Ordinance Area and potential presence of fill onsite, direct communication with the SFDPH would be required.

To evaluate the potential subject property impact associated with the hydraulic lifts on the subject property, Rincon recommends proper removal of the in-ground features of the lifts (pistons and reservoir) following demolition of the onsite building, and sampling to determine if any releases have occurred.

To evaluate the potential subject property impact associated with the adjacent historical dry cleaners, Rincon recommends soil vapor sampling along the eastern, southern and southwestern perimeters of the subject property. In addition, if groundwater is encountered during redevelopment activities on the subject property, groundwater samples should be collected and analyzed for volatile organic compounds (VOCs) by EPA Method 8260B.

Based on the construction of the onsite structures in approximately 1974, asbestos and lead-based paint materials may be present onsite. Although not considered a REC, renovation or demolition of the onsite structures would require an asbestos and LBP survey and possibly abatement.

## DEVIATIONS

Deviations from ASTM Practice were encountered during the completion of this Phase I ESA. A lien search and chain of title review were not completed as part of this assessment.

## SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

The qualified environmental professionals that are responsible for preparing the report include Julie Welch Marshall and Ed Morelan. Their qualifications are summarized in the following section.

“We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in 312.10 of 40 CFR 312. We have the specific qualifications based on education, training and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.”

## QUALIFICATIONS OF ENVIRONMENTAL CONSULTANTS

The environmental consultants responsible for conducting this Phase I ESA and preparing the report include Lauren Kodama Roenicke, Julie Welch Marshall and Ed Morelan. Their qualifications are summarized below.

Environmental Professional Qualifications	X2.1.1 (2) (i) - Professional Engineer or Professional Geologist License or Registration, and 3 years of full-time relevant experience	X2.1.1 (2) (ii) - Licensed or certified by the Federal Government, State, Tribe, or U.S. Territory to perform environmental inquiries	X2.1.1 (2) (iii) – Baccalaureate or Higher Degree from and accredited institution of higher education in a discipline of engineering or science and the equivalent of 5 years of full-time relevant experience	X2.1.1 (2) (iii) – Equivalent of 10 years of full-time relevant experience
Ed Morelan	PG, CEG		MS Geology	30 years
Julie Welch Marshall			BS Environmental Engineering	19 years
Lauren Kodama Roenicke			BS Environmental Studies	2.5 years

**Ed Morelan**, PG, CEG, is a Senior Engineering Geologist with Rincon Consultants. He holds a Bachelor of Science degree in Biology from the University of Southern California, and a Master of Science degree in Geology from the University of California, Los Angeles. He has over 30 years of experience conducting assessment and remediation projects and has prepared or overseen the preparation of hundreds of Phase I and Phase II Environmental Site Assessments throughout California. Mr. Morelan is a Professional Geologist (#4832) and Certified Engineering Geologist (#1822) with the State of California.

**Julie Welch Marshall** is a Senior Project Manager with Rincon Consultants. She holds a Bachelor of Science degree in environmental engineering from Rensselaer Polytechnic Institute, Troy, New York, a Hazardous Materials Management Certificate from the University of California, Santa Barbara Extension program, and a Business Management Certificate from the University of California, San Diego Extension program. Ms. Marshall’s responsibilities at Rincon include implementation of site assessments and development of site remediation programs within the Environmental Site Assessment and Remediation Group. Ms. Marshall has extensive experience performing Due Diligence Phase I and Phase II Environmental Site Assessments as well as managing Brownfields and various remediation projects. She has 19 years of experience conducting research, assessment and remediation projects in California.

**Lauren G. Kodama Roenicke** is an Environmental Scientist with Rincon Consultants. She holds a Bachelor of Science degree in Environmental Studies with an outside concentration of Ecology, Evolution, and Marine Biology from the University of California, Santa Barbara. Ms. Kodama has experience working on Phase I Environmental Site Assessments for a variety of commercial, rural, and industrial properties. In addition, Ms. Kodama has been involved in working on large scale, multi-site projects. Ms. Kodama’s responsibilities at Rincon include implementation of Phase I and Phase II Environmental Site Assessment Reports.

*Interview Documentation*

User Questionnaire

Rincon Project 15-01697 – 490 S Van Ness Avenue, San Francisco, California

---

To qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the “Brownfields Amendments”), the user must provide the following information to the environmental professional. Failure to conduct these inquiries could result in a determination that “all appropriate inquiries” is not complete.

*We respectfully request that you fill out this form and e-mail it to [lkodama@RinconConsultants.com](mailto:lkodama@RinconConsultants.com) within one week from the date of this transmittal.*

1. Why is the Phase I required or being performed?	Analysis of exiting docs for acquisition of property
2. What type of property transaction is planned? (sale, purchase, exchange, etc.)	Purchase
3. What is the entire site address?	490 South Van Ness
4. What is the Assessor’s Parcel Number(s)?	3553-008
5. Are any considerations beyond the requirements of Practice E1527 to be considered? (i.e. lien search, asbestos & lead based paint, radon, etc.)	No
6. Identify all parties who will rely on the Phase I report.	City and County of San Francisco
7. Identify the Property Manager/Contact and how the contact can be reached.	Christopher Smith <a href="mailto:chris@shamrocksf.com">chris@shamrocksf.com</a> Direct: 415.359.2410 Cell: 415.533.3137 2655 Van Ness Avenue, Suite 2 San Francisco, CA 94109

**User Questionnaire**

**Rincon Project 15-01697 – 490 S Van Ness Avenue, San Francisco, California**

<p>8. Identify the Property Owner and how the owner can be reached.</p>	<p>JCN Developers LLC by way of Chis Smith above</p>
<p>9. Do you have copies of any available prior environmental site assessment reports, documents, correspondence, etc., concerning any other knowledge or experience with the property that may be pertinent to the environmental professional (i.e. title report, previous Ph I and II ESAs, Environmental Impact Studies, etc. )?</p>	<p>SMP, Phase 1</p>

**1. Did a search of recorded land title records (or judicial records, where appropriate) identify any environmental liens filed or recorded against the subject property?**

Please checkmark the most appropriate response:

- I have not reviewed the records and *do not know* if there are any filed or recorded environmental liens.
- I have reviewed the records, and *No, there aren't any* filed or recorded environmental liens.
- I have reviewed the records, and *Yes, there are* environmental liens. Explain:

**2. Did a search of recorded land title records (or judicial records, where appropriate) identify any activity and land use limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the subject property under federal, tribal, state or local law?**

Please checkmark the most appropriate response:

- I have not reviewed the records and *do not know* if there are any filed/recorded AULs or any AULs in place at the site.
- I have reviewed the records, and *No, there aren't any* filed/recorded AULs or any AULs in place at the site.
- I have reviewed the records, and *Yes, there are* AULs filed, recorded, and/or in place at the site. Explain:

3. Does the Title Report provide any information pertaining to environmental cleanup liens or activity and use limitations (AULs) for the subject property?

Please checkmark the most appropriate response:

I *have not* reviewed the Title Report and *do not know* if it provides environmental cleanup liens or AULs information.

I *have* reviewed the Title Report, and *No, it does not* provide environmental cleanup liens or AULs information.

I *have* reviewed the Title Report, and *Yes, it does provide* environmental cleanup liens or AULs information. Explain:

4. Do you have any specialized knowledge or experience related to the *subject property* or nearby properties? For example, are you involved in the same line of business as the current or former *occupants* of the *subject property* or an *adjoining property* so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Please checkmark the most appropriate response:

*No, I do not* have any specialized knowledge and/or experience related to the subject property or nearby properties.

*Yes, I do* have specialized knowledge and/or experience related to the subject property or nearby properties. Explain:

5. As the user of this ESA, based on your knowledge and experience related to the subject property, are you aware of any information pertaining to a reduction in value for the subject property relative to any known environmental issues?

Please checkmark the most appropriate response:

*No, I do not* have any information about a reduction in property value relative to environmental issues.

*Yes, I do* have information about a reduction in property value relative to environmental issues. Explain:

6. Does the purchase price being paid for the subject property reasonably reflect the fair market value of the property?

Please checkmark the most appropriate response:

Yes, I do believe the purchase price being paid for the subject property reasonably reflects the fair market value of the property. Skip to question #7.

No, I do not believe the purchase price being paid for the subject property reasonably reflects the fair market value of the property. Proceed to question #6a.

a. If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the subject property? (40 CFR 312.29)

Please checkmark the most appropriate response:

No, I have not considered the idea that known or believed contamination at the subject property has caused the lower purchase price.

Yes, I have considered the idea that known or believed contamination at the subject property has caused the lower purchase price. Explain.

7. Are you aware of commonly known or reasonably ascertainable information about the subject property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example,

a. Do you know the past uses of the subject property?

I do not know.

I do know. Explain: See SMP + Phase I

b. Do you know of specific chemicals are present or once were present at the subject property?

I do not know.

I do know. Explain: Same as above

c. Do you know of any spills or other chemical releases that have taken place at the subject property?

I do not know.

I do know. Explain: Same as Above

d. Do you know of any environmental cleanups have taken place at the subject property?

I do not know.

I do know. Explain: *See SMP + Phase 1*

8. Based on your knowledge and experience related to the subject property are there any obvious indicators that point to the presence or likely presence of releases at the subject property?

Please checkmark the most appropriate response:

No, I do not know and/or do not have any experience with any obvious indicators that point to the presence or likely presence of contamination at the subject property.

Yes, I do know of and/or *do have experience with* obvious indicators that point to the presence or likely presence of contamination at the subject property. Explain:

9. Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products, in, on, or from the subject property?

No, I am not aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products, in, on, or from the subject property.

Yes, I am aware of pending, threatened, or past litigation relevant to hazardous substances or petroleum products, in, on, or from the subject property. Explain:

10. Are you aware of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property?

No, I am not aware of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property.

Yes, I am aware of pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property. Explain:

11. Are you aware of any notice from any government entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?

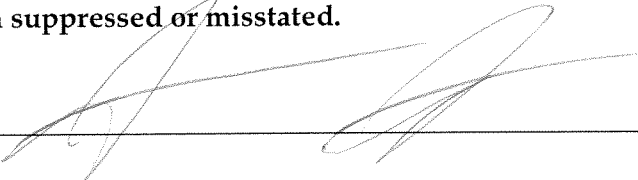

- No, I am not aware of any notice from any government entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.
- Yes, I am aware of a notice, or notices, from a government entity (or multiple government entities) regarding a possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products. Explain:

This questionnaire was completed by (please print):

Name	Kevin Kitchingham	
Title	Project Manager	
Firm	Mayor's office of Housing and Community Development	
Street Address	1 South Van Ness 5 <sup>th</sup> Floor	
City, State, Zip Code	San Francisco, CA 94103	
Phone Number	415-701-5523

	NONE AT THE	PRESENT TIME. NONE AT THE	PRESENT TIME

11)	<b>Are there currently or to the best of your knowledge have there been previously, any industrial drums (typically 55 gallon) or sacks of chemicals located on the property or at the facility?</b>	
	<input type="checkbox"/> <b>Yes</b>	If Yes or Unknown, please describe
	<input type="checkbox"/> <b>No</b>	Not sure. Previous uses are Gas Station with underground storage tanks, also Mechanic/Service Station for vehicles.
	<input checked="" type="checkbox"/> <b>Unknown</b>	

**Property Owner Interview Questionnaire**

**Rincon Project 15-01697 – 490 S Van Ness Avenue, San Francisco, California**

<b>12)</b>	<b>Are there currently or to the best of your knowledge have there been previously, any evidence of fill dirt having been brought onto the property that originated from a contaminated site or that is of an unknown origin?</b>	
	<input type="checkbox"/> Yes	if Yes or Unknown, please describe
	<input checked="" type="checkbox"/> No	
	<input type="checkbox"/> Unknown	

<b>13)</b>	<b>Are there currently or to the best of your knowledge have there been previously, any pits, ponds or lagoons located on the property in connection with waste treatment or waste disposal?</b>	
	<input type="checkbox"/> Yes	if Yes or Unknown, please describe
	<input checked="" type="checkbox"/> No	
	<input type="checkbox"/> Unknown	

<b>14)</b>	<b>Are there currently or to the best of your knowledge have there been previously, any sumps, clarifiers, or solvent degreasers on the property?</b>	
	<input type="checkbox"/> Yes	if Yes or Unknown, please describe
	<input type="checkbox"/> No	SITE HAS BEEN A GAS STATION AND MECHANIC/SERVICE BUSINESS IN THE PAST.
	<input checked="" type="checkbox"/> Unknown	

<b>15)</b>	<b>Are there currently or to the best of your knowledge have there been previously, any stained soil on the property?</b>	
	<input checked="" type="checkbox"/> Yes	if Yes or Unknown, please describe
	<input type="checkbox"/> No	LEAKING GAS TANKS FROM PREVIOUS GAS STATION OPERATION.. CONTAMINATED SOIL HAS BEEN REMOVED/CLEANED. CLEANUP CERTIFICATION ISSUED BY SFDPH.
	<input type="checkbox"/> Unknown	

<b>16)</b>	<b>Are there currently or to the best of your knowledge have there been previously, any storage tanks (above or below ground) located on the property?</b>	
	<input checked="" type="checkbox"/> Yes	if Yes or Unknown, please describe
	<input type="checkbox"/> No	SITE PREVIOUSLY USED AS A GAS STATION WITH GAS STORAGE TANKS LOCATED UNDERGROUND. ALSO THERE IS PRESENTLY AN <u>EMPTY</u> OVERGROUND WASTE OIL TANK ON THE SITE.
	<input type="checkbox"/> Unknown	

<b>17)</b>	<b>Are there currently or to the best of your knowledge have there been previously, any vent pipes, fill pipes, or access ways (etc.) indicating a fill pipe protruding from the ground on the property or adjacent to any structure located on the property?</b>	
	<input checked="" type="checkbox"/> Yes	if Yes or Unknown, please describe
	<input type="checkbox"/> No	THERE WERE PREVIOUSLY VENT PIPES, FILL PIPES AND ACCESS WAYS DURING THE OPERATION OF THE GAS STATION. THESE WERE REMOVED WHEN THE SOIL CLEANUP WORK WAS CARRIED OUT.
	<input type="checkbox"/> Unknown	

**Property Owner Interview Questionnaire**  
**Rincon Project 15-01697 – 490 S Van Ness Avenue, San Francisco, California**

<b>18)</b>	<b>If the property is served by a private well or non-public water system, have contaminants been identified in the well or system that exceed guidelines applicable to the water system or has the well been designated as contaminated by any government agency?</b>	
	<input type="checkbox"/> Yes	if Yes or Unknown, please describe
	<input checked="" type="checkbox"/> No	
	<input type="checkbox"/> Unknown	

<b>19)</b>	<b>Are there currently or to the best of your knowledge have there been previously, any flooring, drains, or walls located within the facility that are stained by substances other than water, or are emitting foul odors?</b>

### Disclaimer - Copyright and Trademark Notice

The EDR FieldCheck® System enables EDR's customers to make certain online modifications to the maps and text contained in EDR Radius Map Reports. As a result, the maps and text contained in this Report may have been so modified. EDR has not taken any action to verify any such modifications, and this report and the findings set forth herein must be read in light of this fact. The EDR FieldCheck System accesses user-modified records from previously submitted reports. Any user-modified record from a previous report that is plotted outside the search radius of this report may not be included in this report.

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

## EXECUTIVE SUMMARY

A search of the environmental records was conducted by Environmental Data Resources, Inc. (EDR). RINCON used the EDR FieldCheck System to review and/or revise the results of this search, based on independent data verification by RINCON. The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### TARGET PROPERTY INFORMATION

#### ADDRESS

490 SOUTH VAN NESS AVENUE  
SAN FRANCISCO, CA 94103

#### COORDINATES

Latitude (North):	37.7655000 - 37° 45' 55.80"
Longitude (West):	122.4179000 - 122° 25' 4.44"
Universal Transverse Mercator:	Zone 10
UTM X (Meters):	551270.6
UTM Y (Meters):	4179751.8
Elevation:	25 ft. above sea level

### USGS TOPOGRAPHIC MAP ASSOCIATED WITH TARGET PROPERTY

## SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

## STANDARD ENVIRONMENTAL RECORDS

### ***Federal RCRA generators list***

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

An online review and analysis by RINCON of the RCRA-LQG list, as provided by EDR, and dated 03/10/2015 has revealed that there are 3 RCRA-LQG sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

An online review and analysis by RINCON of the RCRA-SQG list, as provided by EDR, and dated 03/10/2015 has revealed that there are 21 RCRA-SQG sites within approximately 0.25 miles of the target property.

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

An online review and analysis by RINCON of the RESPONSE list, as provided by EDR, and dated 05/04/2015 has revealed that there is 1 RESPONSE site within approximately 1 mile of the target property.

## EXECUTIVE SUMMARY

### **State- and tribal - equivalent CERCLIS**

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

An online review and analysis by RINCON of the ENVIROSTOR list, as provided by EDR, and dated 05/04/2015 has revealed that there are 26 ENVIROSTOR sites within approximately 1 mile of the target property.

## EXECUTIVE SUMMARY

### **State and tribal leaking storage tank lists**

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the State Water Resources Control Board Leaking Underground Storage Tank Information System.

An online review and analysis by RINCON of the LUST list, as provided by EDR, and dated 03/13/2015 has revealed that there are 173 LUST sites within approximately 0.5 miles of the target property.

### ***State and tribal registered storage tank lists***

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

An online review and analysis by RINCON of the UST list, as provided by EDR, and dated 03/13/2015 has revealed that there are 66 UST sites within approximately 0.25 miles of the target property.

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

An online review and analysis by RINCON of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 25 SWEEPS UST sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

### ***Other Ascertainable Records***

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

An online review and analysis by RINCON of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/10/2015 has revealed that there are 3 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<b>SANTIAGO'S AUTO BODY</b> LOUIS ROESCH CO	<b>145 CAPP STREET</b> 1880 MISSION ST	<b>SSW 0 - 1/8 (0.066 mi.)</b> NW 1/8 - 1/4 (0.131 mi.)	<b>C57</b> O166	<b>68</b> 213

### EDR HIGH RISK HISTORICAL RECORDS

#### ***EDR Exclusive Records***

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

An online review and analysis by RINCON of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 139 EDR US Hist Auto Stat sites within approximately 0.25 miles of the target property.

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

An online review and analysis by RINCON of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 142 EDR US Hist Cleaners sites within approximately 0.25 miles of the target property.

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Release Date: 10/4/1989  
Discovered Date: 10/4/1989  
Substance: Diesel  
Substance Qty: Not reported  
How Discovered: Tank Closure  
How Stopped: Close Tank  
Report Date: 5/16/1991  
Case Closed: 1/18/1996  
Closed Date: 1/18/1996  
Leak Source: Tank  
Leak Cause: Structure Failure  
Leak Confirmed: Not reported  
Entered Date: 5/13/1992  
Number of Wells: Not reported  
Regional Board: San Francisco Bay Region  
Local Agency: 38000  
Lead Agency: Local Agency  
Program: LOP  
Responsible Party: Shell Product  
RP Address: Not reported  
Operator: Andy Sabek  
Staff Initial: VP  
Facility Staff: MA  
Cross Street: 15TH ST  
NOR Date: 5/13/1992  
MTBE Current: Not reported  
MTBE Current Date: Not reported  
MTBE: NT  
Maximum MTBE Soil: Not reported  
Maximum MTBE GW: Not reported  
MTBE DATE: Not reported  
Review Date: Not reported  
Workplan Submitted: Not reported  
Assessment Underway: 10/31/1989  
Pollution Characterization: 11/15/1989  
Corrective Action Plan: Not reported  
Remediation Underway: Not reported  
Monitoring Begun: Not reported  
Funding: Federal  
Interim Remediation: No  
Priority: Not reported  
Abatement: No Action Taken - no action has as yet been taken at the site

**Environmental Interest/Information System**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport,

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**CRITERIA AND HAZARDOUS AIR POLLUTANT INVENTORY**

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include;

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Registry ID: 110001156720

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Interest/Information System**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Interest/Information System**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Classification: Large Quantity Generator  
Description: Handler: generates 1,000 kg or more of hazardous waste during any calendar month; or generates more than 1 kg of acutely hazardous waste during any calendar month; or generates more than 100 kg of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month; or generates 1 kg or less of acutely hazardous waste during any calendar month, and accumulates more than 1 kg of acutely hazardous waste at any time; or generates 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulates more than 100 kg of that material at any time

Handler Activities Summary:

U.S. importer of hazardous waste: No  
Mixed waste (haz. and radioactive): No  
Recycler of hazardous waste: No  
Transporter of hazardous waste: No  
Treater, storer or disposer of HW: No  
Underground injection activity: No  
On-site burner exemption: No  
Furnace exemption: No  
Used oil fuel burner: No  
Used oil processor: No  
Used oil refiner: No  
Used oil fuel marketer to burner: No  
Used oil Specification marketer: No  
Used oil transfer facility: No  
Used oil transporter: No

Universal Waste Summary:

Waste type: Batteries  
Accumulated waste on-site: Yes  
Generated waste on-site: Yes

Waste type: Lamps  
Accumulated waste on-site: Yes  
Generated waste on-site: Yes

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Interest/Information System**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Region: STATE  
Global Id: T0607571586  
Latitude: 37.758517  
Longitude: -122.421281  
Case Type: LUST Cleanup Site  
Status: Open - Assessment & Interim Remedial Action  
Status Date: 07/17/2014  
Lead Agency: SAN FRANCISCO COUNTY LOP  
Case Worker: EH  
Local Agency: SAN FRANCISCO COUNTY LOP  
RB Case Number: 38-2277  
LOC Case Number: 11616  
File Location: Local Agency  
Potential Media Affect: Other Groundwater (uses other than drinking water)  
Potential Contaminants of Concern: Gasoline  
Site History: 7.8.2010: continue site assessment. installation of vapor probes proposed 7/17/2014 Free product found in new well beneath building. Remediation equipment (DPE) must be installed and operated to address free and dissolved product beneath building now under construction. Planned building use is residential condominiums. Indoor air and adjacent soil/subslab vapor sampling also needed.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and
